

The art of powerful cleaning...

# Can Crusher

# Can Crusher

The Airblast Canpacter unit reduces all types of metal cans, tins, oil filter and pails up to 30 litres to up to a sixth of their original size with ease. Enabling not only cost savings on waste skip transport charges to landfill sites but also helps maintain a safer, tidier workspace.

Once an item to be processed is placed within the machine the joystick is depressed to start the approximate 20 seconds cycle, during which the door is locked by an automatic safety system.

Piercers vent any containers installed in the machine without lids being removed, alternatively the same piercers drain solvent deposits when required for desposal and a removable drip tray catches any paint, oil or other liquids which may be expelled from the container during the crushing cycle.

## Features

- Safe and easy operation
- No electrical installation required
- Full height viewing window
- Robust construction
- Maintenance free
- Powder coat finish

## Technical data

Overall height	2020mm
Overall width	665mm
Overall depth	485mm
Depth when door open	810mm
Crusher time cycle (based on a 30 litre pail)	20 seconds
Air requirements	215dm <sup>3</sup> /cycle @10bar/145psi

Canpacter 5 litre bench top machine and Canpacter 205 litre drum models also available.

## Products and services

Blast Rooms	Design and build
Abrasive blast cabinets	Servicing
Portable blast systems	Reconditioning
Blast accessories	Pressure testing
Lighting Systems	Training
Compressors	Sample processing
Dust recovery equip.	Equipment hire
Paint spray booths	
Coating systems	
Coating accessories	
Personal Protective Equip.	
Media	
Testing equip.
