# Powder Coating Booth

Model	Internal Width (mm)	Extract Rate (m3/sec)	Motor Size (kW)	Booth Price Ex-VAT / Ex-Works	Extra Canopy Depth (Per 1m with Lights)
PCB-2000	2000	3.15	3.0	£ 6,674.00	£ 210.00
PCB-3000	3000	4.73	5.5	£ 8,254.00	£ 235.00
PCB-4000	4000	6.30	2 x 3.0	£ 9,844.00	£ 240.00
PCB-5000	5000	7.88	2 x 5.5	£ 12,779.00	£ 260.00
PCB-6000	6000	9.45	3 x 3.0	£ 14,434.00	£ 280.00

## Powder Coating

Our powder coating booths are available in 2000mm wide modules. These modules can be connected to produce a booth of any width (in 2000mm wide increments). Intermediate widths (i.e. 3m or 5m widths) can be achieved with a flared canopy and uprated motors.

Our powder coating booths are constructed from 1.2mm gauge prime galvanised steel sheet. The panels are manufactured using the latest automated CNC punching and folding machinery.

They have a 40mm x 15mm return fold to enhance rigidity of the construction and are bolted together using bright zinc plated M8.8 x 16mm set screws at pitches of 250mm.

The construction gives the booth a smooth internal surface to assist with cleaning and maintenance. The unit will be complete with a 1m deep working canopy.

## Key Features:

- High efficiency filters mean air can be recirculated cleanly back into the factory or workshop, meaning no need to duct through your roof.
- Self-cleaning reverse pulse jet filters automatically fire at set intervals to clean filters, prolonging their life and reducing the cost of consumables.
- Unit comes complete with twin integrated roof lights.
